INDEX

ACTIVATION, artificial, of starfish eggs, as influenced by hypertonic and hypotonic sea water, 361.
Air turbine, for high speed centrifuging of biological material, 48.
Amines, toxicity for Amoeba proteus, effect of H-ion concentration, 276.
Amylase, concentrations in marine fishes, 133.
Amylases, as influenced by temperature, in cold- and warm-blooded animals, 330.
Anesthetics, effect on surface precipitation reaction, 264.
Anoplodactylus lentus Wilson, colored corpuscles of blood, 62.
Anuran tympanic membrane, stability and growth following larval involution, 38.
Asterias forbesii, electrokinetic studies, 247.

BARNES, T. CUNLIFFE. Further observations on the salt requirements of Ligia in Bermuda, 124.
Bases, excess, in sea water, as affected by land drainage, 97.
Bats, embryo, nema parasites in, 357.
BERNSTEIN, ALAN. *See* Howland and Bernstein, 276.
Binary fission, nuclei of various ciliates from fresh-water mussels during, 286.
Biparental males and biparental ratios, in Habrobracon, 166.
BIRNIE, JAMES H. Regeneration of the tail-fins of Fundulus embryos, 316.
Blood, colored corpuscles of, in purple sea spider, 62.
BOSTIAN, C. H. Biparental males and biparental ratios in Habrobracon, 166.

CALCIUM, mobilization of, during development, 351.
Cardiac ganglion of Limulus polyphemus, paradox phenomena in, 102.
Cellulose-digesting flagellate, cultivation of, 182.
Centrifugal force, effects on ectoplasmic layer and nuclei of fertilized sea urchin eggs, 228.
Centrifuged egg of Cumingia, hyaline zone, 257.
Centrifuging biological material at high speeds, with air turbine, 48.
Cerebratulus lacteus, electrokinetic studies, 247.
CHAMBERLAIN, THOMAS K. The glochidial conglutinates of the Arkansas fanshell Cyprogenia aberti (Conrad), 55.
CHAO, IPING. Paradox phenomena in the cardiac ganglion of Limulus polyphemus, 102.
CHESLEY, LEON C. The concentrations of proteases, amylase, and lipase in certain marine fishes, 133.
——, — —. The influence of temperature upon the amylases of cold- and warm-blooded animals, 330.
Chlorogonium and Chilomonas, trophic nature of, 1.
Ciliates from fresh-water mussels, structure and neuromotor system, 69.
—— — —— ——, nuclei during binary fission, 286.
COE, WESLEY R. Analysis of the regenerative processes in nemerteans, 304.
COONFIELD, B. R. Coördination and movement of the swimming plates of Mnemiopsis leidyi, Agassiz, 10.
COSTELLO, DONALD P. The hyaline zone of the centrifuged egg of Cumingia, 257.
Cultivation of cellulose-digesting flagellate and other termite protozoa, 182.
Cumingia tellinoides, electrokinetic studies, 247.
Cyprogenia aberti (Conrad), glochidial conglutinates, 55.

DAN, KATSUMA. Electrokinetic studies of marine ova. II. Cumingia tellinoides, Asterias forbesii, Echinarachnius parma, Nereis limbata, and Cerebratulus lacteus, 247.
DAWSON, ALDEN B. The colored corpuscles of the blood of the purple sea spider, Anoplodactylus lentus Wilson, 62.
Division, longitudinal, in Hydra, 326.
Dogfish, hematological studies in, 115.
Drainage, from land, effects on excess bases of sea water, 97.

ECHINARACHNIUS parma, electrokinetic studies, 247.
Ectoplasmic layer, effects of centrifugal force on, in fertilized sea urchin eggs, 228.
Egg-trinuclearity, in Habrobracon, 145.
Elasmobranch fishes, control of dermal melanophores, 30.
Electrokinetic studies, marine ova, 247.
Eosin, concentration of, and photodynamic effect on tentacles of terebellid worm, 346.

FERTILIZATION, artificial, and induced ovulation in the frog, 22.
Fundulus, regeneration of tail-fins in embryos, 316.

GLAZER, OTTO, and EDMUND PIEHLER. The mobilization of calcium during development, 351.
Glochidial conglutinates of Cyprogenia aberti (Conrad), 55.
GREB, RAYMOND J. *See* Whiting, Greb, and Speicher, 152.

HABROBRACON, biparental males and biparental ratios, 166.
——, egg-trinuclearity, 145.
HAMLETT, G. W. D. Nema parasites in embryo bats, 357.
HARVEY, ETHEL BROWNE. Effects of centrifugal force on the ectoplasmic layer and nuclei of fertilized sea urchin eggs, 228.
HARVEY, E. NEWTON. Biological effects of heavy water, 91.
—— — ——. The air turbine for high speed centrifuging of biological material, together with some observations on centrifuged eggs, 48.
HEDENIUS, ASTRID. *See* Svedberg and Hedenius, 191.
HELFF, O. M. Studies on amphibian metamorphosis. XIII. Stability and growth of anuran tympanic membrane following larval involution, 38.
Hematological studies in dogfish, 115.
H-ion concentration as factor in toxicity of amines for Amoeba proteus, 276.
HEILBRUNN, L. V. The effect of anesthetics on the surface precipitation reaction, 264.
HOWLAND, RUTH B., and ALAN BERNSTEIN. H-ion concentration as a factor in the toxicity of amines for Amoeba proteus, 276.
Hyaline zone of centrifuged egg of Cumingia, 257.
Hydra, longitudinal division in, 326.

INVOLUTION, larval, followed by stability and growth of anuran tympanic membrane, 38.

KIDDER, GEORGE W. Studies on the ciliates from fresh-water mussels. I. The structure and neuromotor system of Conchophthirius anodontae Stein, C. curtus Engl., and C. magna sp. nov., 69.
——, —— —. Studies on the ciliates from fresh-water mussels. II. The nuclei of Conchophthirius anodontae Stein, C. curtus Engl., and C. magna Kidder, during binary fission, 286.

LIGIA, salt requirements of, in Bermuda, 124.
LILLIE, RALPH S. The influence of hypertonic and hypotonic sea water on the artificial activation of starfish eggs, 361.
Limulus polyphemus, paradox phenomena in the cardiac ganglion, 102.
Lipase, concentration of, in marine fishes, 133.
LOEFER, JOHN B. The trophic nature of Chlorogonium and Chilomonas, 1.

MELANOPHORES, dermal, control of, in elasmobranch fishes, 30.
Metamorphosis, and growth of anuran tympanic membrane, 38.
MITCHELL, PHILIP H., and JULIAN P. SOLINGER. The effects of land drainage upon the excess bases of sea water, 97.
Mnemiopsis leidyi, Agassiz, coördination and movement of swimming plates, 10.

NEMA parasites, in embryo bats, 357.
Nemerteans, regenerative processes in, 304.
Nereis limbata, electrokinetic studies, 247.
Nuclei, effects of centrifugal force on, in fertilized sea urchin eggs, 228.
—— of ciliates during binary fission, 286.

OVA, marine, electrokinetic studies of, 247.
Ovulation, induced, and artificial fertilization in the frog, 22.

PARASITES, nema, in embryo bats, 357.
PARKER, G. H., and HELEN PORTER. The control of the dermal melanophores in elasmobranch fishes, 30.
PIEHLER, EDMUND. *See* Glazer and Piehler, 351.
PORTER, HELEN. *See* Parker and Porter, 30.
Proteases, concentrations, in marine fishes, 133.

REGENERATION, of tail, as affected by Ringer's solution, in tadpoles of Rana palustris, 7.
——, of tail-fins of Fundulus embryos, 316.
——, processes of, in nemerteans, 304.
Respiratory proteins, sedimentation constants, 191.
REZNIKOFF, PAUL, and DOROTHY GROUT REZNIKOFF. Hematological studies in dogfish (Mustelus canis), 115.
Ringer's solution, effect on tail-regeneration, in Rana palustris, 7.
ROUDABUSH, ROBERT L. Present status of longitudinal division in Hydra, 326.
RUGH, ROBERTS. Induced ovulation and artificial fertilization in the frog, 22.

SALT requirements of Ligia in Bermuda, 124.
SAYLES, LEONARD P. Effect of Ringer's solution on tail-regeneration in the tadpole of Rana palustris, 7.
SCHMUCK, M. LOUISE. The male somatic chromosome group in Sciara pauciseta, 224.
Sea urchin eggs, fertilized, effects of centrifugal force on ectoplasmic layer and nuclei, 228.
Sea water, effect of land drainage on excess bases, 97.
—— ——, hypertonic and hypotonic, influence on artificial activation of starfish eggs, 361.
Sedimentation constants of respiratory proteins, 191.
Sex-intergrade, new type of, 152.
SOLINGER, JULIAN P. *See* Mitchell and Solinger, 97.
Somatic chromosome group, male, in Sciara pauciseta, 224.
SPEICHER, B. R. *See* Whiting, Greb, and Speicher, 152.
Starfish eggs, influence on artificial activation of hypertonic and hypotonic sea water, 361.
Surface precipitation reaction, effect of anesthetics on, 264.
SVEDBERG, THE, and ASTRID HEDENIUS. The sedimentation constants of the respiratory proteins, 191.
Swimming plates, coördination and movement of, in Mnemiopsis leidyi, Agassiz, 10.

TAIL-fins, regeneration of, in Fundulus embryos, 316.
Temperature, influence on amylases of cold- and warm-blooded animals, 330.
Tentacles, of Terebella magnifica W., structure and reactions of, 339.
——, photodynamic effect of eosin on, of terebellid worm, 346.
Terebella magnifica W., structure and reactions of tentacles, 339.

TRAGER, WILLIAM. The cultivation of a cellulose-digesting flagellate, Trichomonas termopsidis, and of certain other termite protozoa, 182.
Trophic nature of Chlorogonium and Chilomonas, 1.

WATER, heavy, biological effects, 91.
WELSH, JOHN H. The concentration of eosin and the photodynamic effect on tentacles of a terebellid worm, 346.
——, —— —. The structure and reactions of the tentacles of Terebella magnifica W., 339.
WHITING, P. W. Egg-trinuclearity in Habrobracon, 145.
——, —., RAYMOND J. GREB, and B. R. SPEICHER. A new type of sex-intergrade, 152.
